There's no such guarantee that a site you have joined is either safe or dangerous to deposit money just to play casino games. I am only relying on casinos with free bonus deposits.

Hello,

Now a days playing online casino or poker is very much safe, only before submitting money to that site please check as many reviews of that particular website as you can.

Thanks

There are much easier to list casinos that you can safely play in. The list of "bad" casinos will stretch into hundreds of points.

Look at the casino`s license - all licensed casinos are listed on the regulatory`s websites. By the way, you can read feedback from users on casino`s forums: negative feedback on competitors` website will not moderated;)
