## I Just Got Wiped Out!

Hi People,

I just like literally lost \$500 in 10 minutes playing blackjack, I'm sure its fixed, the dealer got two blackjacks in a row. Can you believe that.

Anyone got any blackjack tips, cause I think I need some. Something a little more advanced than basic strategy please. B)

I can say only one thing: if you got wiped out, you don't use money management techniques. Advanced blackjack strategies are very helpful, but they won't gurantee that the dealer won't have 5 blackjacks in a row. Define the amount of money you can lose in one game and never exceed this.
