
Online or Land Based?

Posted by Bonus Expert - 2008/10/14 14:01

Hey guy's

where do you guy's prefer to play in a real casino or online in the comfort of your own home?

Personally I like real casino's, you can chat to real people, it's all just a bit more real I think.

Mind you I do really like the massive bonuses you get online ;) that's how I make my living

Hi There,

yeah I agree, I much prefer online casinos because you can do pretty well just making a min. deposit and then playing with the casino's own bonus so you're not really playing with your own money.

I've never really played at landbased casinos, does interacting with real people help you play better?

Becca

Hey

Im not really sure it helps you play better, it's just more of a laugh I guess and when your winning big people gather round and get excited which is kind of fun :cheer:

I would say landbased is much more fun but can also be distracting. I tend to have a few drinks when at a landbased casino which can also impair your judgement. For pure fun, landbased but if your looking to make some cash I would say online. Between bonuses and you can get and the fact that you can control your environment its more practical to play online.

Yeah, that's what I thought, I guess it really depends whether you want a bit of entertainment or are really just wanting to stay focused and make some money.

Hi,

I much prefer online casinos as I don't like betting amongst strangers, I feel much more comfortable in my armchair with my laptop. That said I often wonder if you can really trust online casino's, I mean how do you know the software isn't rigged? I have seen some strange outcomes, such as three zeroes in a row on the roulette table, surely that doesn't happen in land casinos?

I think you summed it up, there are pro's and cons between the two different types.

Playing at a real casino you get the social side of it which is great when your out with your mates and having a nice drink or two to get you in the mood.

But then online you get the extra bonuses, the extra money and if you play your cards right can make a hell of a lot of money.

Don't get me wrong, you can still make loads in a real casino but the bonuses can be a massive plus!

I'd say with real casinos, I like my drink to much, sad but I don't like drinking in front of a screen on my own hehe.

Hey Man

Actually it does!

In my local casino they have 4 roulette tables, and one time I playing they hit a double, and I asked do you ever get trebles and the croupier said yes every week, I know crazy!

He meant between all the tables and all the croupiers but that goes to show it does happen, you just have to be betting on the right table at the right time and that treble could make you rich, Imagine if you had just £10 on a high limit table on say zero...

It comes up once and you have £350, say you put that back on zero and it hit's again, you have £12,250, the table limit is £500 but you think why not gofor the treble and whack another £500 on Z you can now walk away with a cool £29,250.

Now imagine if it was an even higher limit on the roulette table! :side: .

Anything can happen, it's really all luck. I have seen some funny things happen at land casinos as well.

Hi guys and gals

I'm sure you'd all agree that playing casino games online is more comfortable than being out in the casino with people getting in your way, especially when playing a big game of roulette.

You can get from one casino to the next without moving anywhere if that helps lol :P

There are perks in the landbased casino that online casino cannot provide and vice versa.

I think both are favorable to one depending on your situation and geographic location.

Happy playing!

I prefer to play online.

There are many advantages to playing in an online casino, as there are to playing in a real world casino. Similarly, there are disadvantages to playing in each, so a lot of the time the debate as to which is best often comes down to personal choice and personal circumstances.

Agree on you Stonebill. Online Casino is much better than going to the shop where lots of people can destruct your concentration whereas on online you can think great strategies well without destruction around. Also online casino is safer, less hassle, and very convenient.

"All the evidence shows that God was actually quite a gambler, and the universe is a great casino, where dice are thrown, and roulette wheels spin on every occasion"

-Stephen Hawking

I prefer online casino because I can play my favorite online games. It is convenient, hassle-free, and very comfortable. I also enjoy playing it online because there are free games so I won't spend any cents from my pocket. :)

The advantages of online gambling are more compared to land based gambling. You save your time while you enjoy the fun of gambling right from your home. This article discusses the benefits of online gambling. Online casino gambling is becoming very popular these days. With online gambling you get the same fun and excitement as you get at a land based casino. Land based casinos are limited to the number of Blackjack tables they can fit onto their casino floors which means you may find up to 3 variations of the game if you are lucky...
