
Smoking

Posted by Bonus Expert - 2009/07/13 13:12

Was in my local casino on Saturday and couldn't help remembering how good it was to be able to have a cig at the blackjack table.

I suppose if you don't smoke its better, but unfortunately I do!

A Comment!! I think step by a very similar situation to that of many others. Usually I do not like the smell of Cigarette; but i so try to play online so I avoid the awkward moment and not bother anyone but I believe we should respect your opinion friend. Usually heracasino.com game and I am from my work in my spare time in my house, ect ... I think it should be non-smoking local casinos and if any did not know ... sorry! :laugh:

Hey Bonus Expert,

You can smoke at most online casinos ;)

Tobacco smoking is the practice where tobacco is burned and the vapors either tasted or inhaled. The practice began as early as 5000–3000 BC. Many civilizations burnt incense during religious rituals, which was later adopted for pleasure or as a social tool. Tobacco was introduced to the Old World in the late 1500s where it followed common trade routes. The substance was met with frequent criticism, but became popular nonetheless. Smoking kills one half of all smokers who don't manage to stop—as of 2007, about 4.9 million people worldwide each year.
